GT-1210 Horizontal Bumper Tube With Anti-Skid & Conspicuity Tape Recess 4" Steel Safety Bumper Tube

Weight: 7.0 lbs./ft.

Globetech bumper tube is a key ingredient of vehicle safety. One piece design provides an integral 2" inset area that neatly positions and protects the reflective tape from damage. The tube is constructed from 50,000 yield high strength steel, and incorporates full penetration welding for long, durable service. Choose from two surfaces: standard flat surface or safety grip surface for added traction.

Cross Section

Hole Punch Pattern Dimensions

NOTE: Dimensions "A" and "C" must be specified in even increments of 2". Dimension "D" must be 1-1/2" minimum.

IMPORTANT: The Globetech Bumper Tube is sold to original equipment trailer manufacturers and to the trailer aftermarket for use as the horizontal structural member of a trailer's Rear Impact Guard. This Rear Impact Guard is required under federal law in both the U.S. and Canada. It is the responsibility of the installer of the Globetech Bumper Tube to insure that it and the complete Rear Impact Guard assembly is installed per the trailer manufacturer specifications and complies with any and all state/provincial and federal laws and regulations. In the U.S., Rear Impact Guards are regulated under Federal Motor Vehicle Safety Standards FMVSS 223/224 and Federal Motor Carrier Safety Regulation FMCSR 393.86. In Canada, they are regulated by Motor Vehicle Safety Act Standard 223.

WARNING: It is the responsibility of the installer of this bumper tube to insure that it and the entire Rear Impact Guard assembly is installed in accordance with the trailer manufacturer's specifications and in compliance with Federal Motor Vehicle Safety Standards FMVSS 223/224 (U.S.) or Motor Vehicle Safety Act Standard 223 (Canada). Failure to do so could result in death or serious injury to occupants of another vehicle in the event of a rear end collision with the trailer.

ARMOR GUARD

Domestic Mud Flaps MADE IN USA

DOMESTIC ARMOR GUARD MUD FLAP

The Armor Guard splash guard is made from 100% fiber reinforced rubber. The header is molded thicker to resist tearing through normal use. The top corners can be cut to fit standard 45 degree angle brackets. While the bottom can be cut down when a shorter flap is needed.

Tear Resistance

The resistance to growth of a nick or cut when tension is applied to the cut specimen. (ASTM D-624.)

Tensile Strength

The tensile strength of a rubber compound is its resistance to rupture under tension. It is measured as strength at break and expressed in pounds per square inch of cross section. This property has an absolute value in some applications where the product is actually subjected to tension in service but, like the other tension properties, it is most frequently used in evaluating compounding materials on a cooperative basis.

In a series of cures with a variable time factor the tensile strength either passes through a maximum or exhibits a marked change in the slope of its curve. Therefore, the tensile strength may be considered either separately or together with the modulus and elongation in defining an optimum state of cure for any specific compound.

CHEVRON MUD FLAP

This is our economy least expensive mudflap. These flaps are thinner and molded from natural rubber and reinforced with "Small Fibers". This flap has a High tear strength!

Look for the  logo! Many import chevrons are not made by Globetech and tear easy.

5/16" Standard Mud Flaps

Globetech's Standard Mud Flaps

Globetech uses the finest material available to mold its standard mud flaps. These are the most popular mudflaps for logo use.

This material also meets all MIL-SPEC for Military Contractors.

Our 5/16" Standard splash guards are slightly heavier than our Chevron flaps. The majority of our customers prefer the Standard flap for their Custom logos.

XTREME MUD FLAP

- Our Xtreme Mud Flap is molded from high tensile strength rubber. Using conveyor belt technology, a wire of nylon sheet is molded into the mud flap for greater durability.
- Great for dump trucks and off-road use
- Highest tear strength of any mud flap
- Stiffer flap prevents waving
- Available with silk-screen or raised molded logo

Tireplast Mud Flaps

This recycled rubber is a combination of recycled rubber (from tires) and plastic, tireplast is environmentally friendly and allows for custom product specifications. A great replacement for most natural and synthetic rubber, tireplast has low temperature impact toughness, tensile strength, flexibility, and sound deadening capabilities. Tireplast is resistant to many chemicals including alcohol, anti-freeze, diesel fuel, gasoline, grease, hydraulic oil, kerosene, motor oil, distilled water, and salt water.

Quarter Fender Mounting Instructions

Recommended quarter fender mounting will result in maximum fender and top flap product life.

50-foot pounds of torque is needed on the steel clamp and 75-foot pounds of torque is needed on the stainless clamp. This torque is to be applied to the nut instead of the bolt. When this torque is applied, the flange end of the clamp should touch.

Braceless Standard Quarter Fender

- Durable 18 gauge formed metal
- Tube cradle support for added rigidity
- Mirror finish stainless steel
- Assembly required

Wheel End

Globetech's standard hub caps are die-cast from a 380 aluminum alloy. They resist cracking, warping and breaking in any conditions.

- Each hub cap is individually poly-bagged.
- Vent plug is molded in a nitrile rubber.
- Dow Corning CALIBRE lens, UV-stabilized.

G - Dirt exclusion grease hub cap

S - Side fill for oil

Description: GT-8011 is a low density cellulose fiber material with high rubber filler content and a nitrile butadiene rubber binder. It provides excellent sealing of oil and water at low flange pressures, and is used primarily for engine and transmission pan gaskets, water pumps, and environmental seals. It is intended for applications with short duration maximum temperatures up to 180°C (350°F). GT-8011 has UL component recognition.

TEMPBOLT™ Patented

Avoid expensive bearing failures, unscheduled down time, costly road service calls and missed delivery appointments. Install the new **Globetech TempBolt™** in the hubcaps of your tractors and trailers today.

A **Globetech TempBolt™** installed in your hubcap can warn you of pending bearing problems. The TempBolt's visual red indicator pops out if the hub temperature reaches or exceeds 250° F. Only one **TempBolt™** is needed for each hubcap. This product is not a replacement for a rigorous hub preventive maintenance program.

- Tested and Approved by the TRUCK OEM Technical Center
- Several brake drag-tests were conducted to test drum temperature effect on the TempBolt™. The TempBolt™ did not activate due to high drum temperature. Only when the HUB exceeds 250° F does it activate.
- Anytime the oil temperature is consistently over 300° F, bearing failure can occur. At this temperature the oil will lose its lubricity causing the bearings to create more heat and eventually fail.
 - With the activation temperature set at 250° F, the **TempBolt™** warns you BEFORE a failure occurs.
 - In a typical operation, hub oil temperature runs between 150-200° F.
 - The **Globetech TempBolt™** can be used in any hub (tractor or trailer) that has a 5/16" diameter hubcap bolt.
 - When installing, do not exceed 14 ft. lbs. torque.

The **Globetech TempBolt™** is available in a "point-of-purchase" display box, containing 50 individual bags of 4 bolts. Encourage your customers to make it part of their preventative maintenance program.

Metal Double Seal Cap

This double seal cap seals at the top of the cap which prevents dirt and water from penetrating the cap, eliminating the chances of clogged air passages due to ice and debris. Allows for inflation and deflation of the tire without removing the cap. A great time saver.

Spring Brakes Made In U.S.A

Globetech's Spring Brakes are Assembled in the U.S.A.

- Combination of USA made components and imported components
- Each chamber is assembled in the USA and date coded
- Each component is inspected before assembly

Globetech's Spring Brakes are 100% Tested in the U.S.A.

- Meets all SAE J14659 Air Actuators test procedures
- Cycle life test passed for 1 million cycles on parts side and over 200K on spring side

Technical Information

Power Spring

Black passivated and passes 48 hr salt spray test
CNC coiled and meets both force and life cycle requirements
as published by Society of Automotive Engineers 1 million cycle test

Non-Pressure Housing

11 Gauge with reinforced mounting bolts to prevent damage
Black E-coating and passes 200 hr salt spray test

Clamp Bands

Matched stamping for maximum seal and life
High strength steel material consistent long-life pressure
Zinc coated and corrosion prevention passes 72 hr salt spray test

Push Rod

Thick steel plate exceeds all OEM standards
Rolled edge creates smooth working surface
Orange stroke alert indicator OEM
CNC welding for push rod/plate attachment (very strong)

Aluminum Adapter

Die cast 360 spec. aluminum
Double O-Ring seal
Ground/plated push rod for smoothest friction surface

Rubber Air Brake Hose (Bulk)

Manufactured to OEM Specs

Destructive Tests

Destructive tests are conducted on short specimens of hose, normally 18 inches to 36 inches in length and, as the name implies, the hose is destroyed in the performance of the test.

A. Burst pressure is recorded as the pressure at which actual rupture of a hose occurs.

B. A hold test, when required, is a means of determining whether weakness will develop under a given pressure for a specified period of time.

Non-Destructive Tests

- Proof pressure test
- Change in length test (elongation or contraction)
- Change in outside diameter or circumference test
- Warp test
- Rise test
- Twist test
- Kink test
- Volumetric expansion test

AIR BRAKE, TYPE A - SAE J1402 & DOT FMVSS 106

Air Brake hose is designed for conveying air in truck and trailer brake systems. Truck and trailer manufacturers, aftermarket packagers and wholesalers use this hose. It is certified to meet D.O.T. FMVSS 106 and SAE J1402A requirements. The EPDM tube and cover with the 4-spiral reinforcement make this hose virtually kink proof. This hose is durable enough to handle this safety related application.

Cover Color: Black
Oil Resistance: Medium
Construction:

Tube: EPDM, RMA Class C
Cover: EPDM, RMA Class C
Reinforcement: Spiral polyester yarn
Temperature Range: -40°F to +200°F

Minimum Bend Radius

Minimum Hose Bend Radius Data (MBR)

The Bend Radius is the radius of the bent section of a hose measure to the innermost surface of the curved portion. It is important because the minimum bend radius is the maximum amount a hose can be bent without being kinked or damaged.

Part No.	Nominal I.D. (in)	Nominal O.D. (in)	Working Pressure	Min. Bend Radius (in)	Weight (lb/ft)	Length

Air Brake Nylon Tubing (OEM USE)

- For air brake systems only- NOT for fuel line applications
- SAE Type A tubing is single wall extruded nonreinforced nylon
- SAE Type B tubing has seamless extruded nylon core with fiber reinforced protective nylon cover
- Can be used with either air brake or nylon tube fittings
- 150 psi maximum working pressure
- UV and ozone resistant nylon material
- Withstands temperatures of -40 to +200 F

A New Solution for Repairing Damaged Rubber Air Lines

Including	Two nylon shells provide corrosion resistant to improve air system life 	One brass fitting with NPTF thread and coating provides tight connection 	One assembly ring offers a tight crimping. 	One wrench offers a easy installation and reduce residual torque. 	One nylon hose barb takes a strong grasp to the rubber hose. 
Assembly	Step 1. Cut off the damaged end of the hose. Position hose end on the inside groove of the shell. 	Step 2. Insert the brass fitting into the lock shell. 	Step 3. Assemble the other side of the shell onto the brass fitting and the hose. 	Step 4. Slide the assembly ring over the shell to its final position on the shell. 	Step 5. Insert nylon barb into the fitting, turn and push it with the wrench until flush inside the fitting. 

Notice:

1. Greasing the nylon barb before inserting it into the fitting.
2. Check final assembly visually to insure that hose has not shifted position during assembly.

Selecting a Slack Adjuster

- 1. Determine if straight or offset arm If offset determine if RH or LH needed.
- 2. Identify spline size (diameter and number of teeth).
- 3. Select model needed.
- 4. Determine the arm hole used (if slack contains more than one).
- 5. Identify bushing diameter.
- 6. Measure from center of arm hole used to center of splined hole to determine arm length (A).

All Globetech
slacks meet the
following criteria:

TS16949 Certified
Meet SAE J1461-91 &
SAE Ji512-90 Standards
Torque Rating:
20,000 - 26,000 inch lbs.
or 2,300 - 3,000 Newton

GLOBETECH-TOUGH

Shock Absorbers

GLOBETECH keeps working long after the job is done

Quality components, precision engineering and a durable, robust design ensure top performance throughout the life of Globetech heavy-duty shock absorbers, and reduce wear and tear on other costly suspension parts.

Drawn over Mandrel (D.O.M.) Inner Cylinder Tube

- Provides smooth surface on inner cylinder for piston seal and piston bearing face
- Less chance of scoring and better durability
- Higher tolerance on the I.D.

Super-Finished Chromed Piston Rods

- Provides superior corrosion resistance, performance and product life

Bulged Design

- Increased fluid capacity
- Lower operating temperatures
- Less internal wear due to heat dissipation

Pressurized, Floating Piston Seal Design

- Self compensates for wear over shock life
- Rugged and durable design
- Less fade, more consistent performance over the full range
- Reduces force-velocity variabilities, increases control capabilities at low velocities

Forged Solid Steel Eye Rings and 360° Arc-Welded End Mounts

- Greater tensile strength
- Reduces end mount failures

Triple Lip, Nitrile Rod Seal

- Extra seal protection improves fluid retention
- Leads to longer product life

Hydraulic Extension Stop

- Unique and robust design
- Prevents shocks from topping out and suspensions from over-extending
- Significantly reduces fatigue in mounts, lights and other vibration sensitive components

10 Stage All Coil Spring Valving

- For comfort and control
- Enhanced durability
- Self-cleaning

Globetech Heavy-Duty Truck Shocks for Class 3-8 Trucks, Buses and Trailers

83000 Series Globetech Shock Absorbers

- Globetech's smallest heavy duty product, for light trucks or heavy truck front suspensions.

85000 Series Globetech Shock Absorbers

- The standard heavy duty product for today's low friction suspensions.
- 1-5/8" bore provides improved durability.
- 360° arc welded end mounts protect against end mount breakage.
- Hydraulic rebound stop prevents impact damage to the shock and vehicle mounting components.
- Multi-lip piston seal provides backup seal protection.
- Welded closure improves pull-apart strength.

89000 Series Globetech Shock Absorbers

- Premium three position adjustable heavy truck gas shock.
- Position adjustable offers personal ride selection.
- 1-5/8" bore, 360° arc welded end mounts provide improved durability.
- Specially formulated H.T. fluid reduces friction and wear in extreme operating conditions
- Many more premium component upgrades combine to provide the ultimate in performance and durability.

GT-81800 Flag Magnet

Great for attaching flags to machinery & flat steel surfaces.
 Chrome steel
 Size 2.63" dia.
 Has 80 lb pull strength.
 Functional, durable and rust resistant.
 Includes 1/4" wing nut to hold flag securely

Emergency Flare Kits

Part Number	Description
GT-8500	Triangle warning kit, 3 triangles per kit with plastic container

Emergency Triangle Kit

- Each kit contains three HD triangles packaged in a red storage box
- Durable fluorescent orange plastic with red reflectors are visible day or night.
- Snaps together for fast and easy set up
- Heavy weighted sand filled base provides stability even in windy conditions
- Friction pads on base keeps triangle in place on highway
- Meets all applicable FMVS 12 and SAE/DOT specifications
- Instructions for proper use molded in the cover and on all triangles

Make sure your vehicle meets FMVSS 125

- FMVSS 125 establishes shape, size and performance requirements for non-powered day and night warning devices that can be erected on or near the roadway to warn approaching traffic of the presence of a stopped vehicle. The purpose of this Standard is to reduce deaths and injuries due to rear-end collisions between moving traffic and disabled vehicles
- Required Application: buses and trucks with GVWR greater than 4,536 kg (10,000 lbs.)

WARRANTY POLICY

GLOBETECH Manufacturing warrants its products to be free from manufacturing defects for a period of one year from date of shipment. Buyer's exclusive remedy and seller's sole liability hereunder shall be limited to refund of the purchase price or replacement of the product shown to be other than as warranted. Conditions resulting from misuse, negligence, alteration, accident, or improper installation, maintenance, or application shall absolve seller of all liability. The foregoing constitutes the sole warranty of GLOBETECH Manufacturing with respect to its products and in lieu of all other warranties, expressed or implied, including any implied warranties of merchantability or of the fitness for a particular purpose. In no event and under no circumstances, shall GLOBETECH Manufacturing be liable for consequential or special damages.

RETURN POLICY

GLOBETECH Manufacturing will allow one return per year, not to exceed 5% of the previous year's purchases. Custom-made products may not be returned. Each return is subject to a 15-20% restocking fee, AND requires an RGA number issued by GLOBETECH Manufacturing. Customers must pay freight on all returns, and package items in such a way that makes our RGA number clear and obvious. All products must be in excellent condition, suitable for resale. We reserve the right to refuse any and all requests for product returns, based on poor condition of product, or on obsolescence of a particular item or product line. Credit for returns shall be in the form of a credit to customers account for use against further purchase.
